

“With our phased rollout approach, we wanted to take advantage of Office Project Server as soon as possible without a significant investment of time and money up front. VirtualePM[®]'s configuration allowed us to leverage industry best practices, drive standardization and be up and running in less than two weeks. It just made sense.”

~ Jan Wells, Corporate PMO
Millipore Corporation

Affordable and Scalable Project Management Solution

World-Class Enterprise System

VirtualePM[®] (VePM) is a hosted, subscription-based service that utilizes the Microsoft Enterprise Project Management platform. Microsoft EPM is ranked by Gartner as a leader in the Project Portfolio Management space. The solution is pre-configured with 'best of breed' reports, views and processes that enforce standardization and help organizations gain the visibility they need to manage enterprise resources, schedules and budgets. VePM's out-of-the box configuration was developed leveraging nearly 200 EPM implementations.

Easy Adoption

VePM reduces change management risks by allowing project managers to use a familiar application (Microsoft Office Project) and gives team members a clean, easy-to-use web-based interface to enter progress, view project plans

and communicate with all project team members. Additionally, VePM comes with role-based training that is personalized and delivered virtually, by one of our expert trainers - on your schedule. We'll work with you to develop a focused, comprehensive training program specific to your needs.

Customization

As your organization matures, your project management system will need to adapt. With our Premier Services Team, the VePM environment can be configured to meet your more sophisticated process, reporting and collaborating needs. Our team will also ensure that VePM continues to meet your critical project needs.

Simple to Use

VePM was built on the principle that simplicity is power. If an application is difficult and time consuming, it won't be used. VePM is intuitive, and follows the best-of-breed methodologies published by the Project Management Institute (PMI) and adheres to the Microsoft Project delivery methodology.

Simple to Set Up

Your VePM account manager will walk you through configuration templates that will allow our services team to configure the solution to meet your specific needs. All work is done remotely, to your specifications on our hosted server. Within ten days, your team can be utilizing the VePM environment to manage their resources and critical initiatives.

“Organizations unable to support or afford a large enterprise project and portfolio management implementation should consider the software-as-a-service or on-demand (application service provider) option as an alternative to an expensive, long-term commitment.”

~ Daniel B. Strang
Gartner

Cost Effective

Enterprise Management Solution Without the Price Tag

Most enterprise project management systems take months to design, configure and implement. VePM is pre-configured with industry best practice and can be set up in just days without the expense of lengthy consulting engagements and IT infrastructure costs.

Long-Term Affordability

VePM is the only solution using Microsoft Office Project that allows organizations to migrate their system in-house for a fixed, flat rate after only one year of service. This allows your organization to get up and running quickly at a low-cost without being locked into a long-term hosting contract.

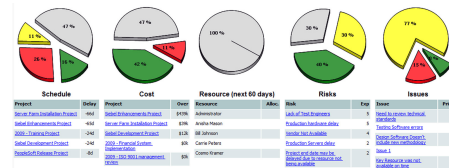

Payment Options

Simply pay with a credit card...

THERE ARE NO LONG-TERM CONTRACTS or commitments. If you decide the solution is not for you, simply cancel your subscription.

* Monthly invoicing options are available.

Offering Visibility

Dashboards & Reporting

VePM provides visibility to track all aspects of project management portfolio. Portfolio reporting is dynamic, timely and meaningful. Unique dashboards and reports allow you to track milestones, risks, issues and costs across your entire portfolio of projects in real-time. VePM dashboards can also be leveraged outside of the PMO for reporting in Finance, HR, and across the executive management team. Custom templates ensure consistency in data and reporting which greatly enhance visibility across departments.

Dedicated Support Manger

VePM customers have an account and support manager to help them setup, schedule training and answer any support questions. Your dedicated VePM support specialist is available 8am-6pm EST via the toll-free support line. You can also e-mail your support issues to our team of specialists and receive a reply within two hours. Your support specialist will work with you to design a support plan that ensures long-term success.

Training

VePM includes custom training for project managers, team members, resource managers and executives. All system users receive training guides and quick reference cards with your subscription. Simply register online and download the PDF training guides prior to the course. A dedicated account manager will work with you to deliver the right level of team member training ensuring

Track Risks, Issues & Documents

As the center of your project management universe, VePM gives organizations a powerful document management system with check-in, check-out and auditing features for logically managing all project artifacts. Issues, risks and status reports are stored centrally and can be tracked manually or through built-in e-mail and system notifications.
